Solar Reflective Index(SRI)-Colors with a value of 29 or greater are eligible for LEEDS credit.

There are many factors that can impact the finished appearance of colored, decorative concrete. Concrete is produced from natural materials. Different cements, sand, rock, mixing, job-site conditions, finishing and curing methods as well as contractor technique can alter and determine the final color. Because these factors, conditions of use and application of our colored products are beyond our control, Shamrock Materials, Inc. MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE and expressly disclaims liability for consequential or incidental damages whether based on theories of warranty or negligence.
