

FUEL SURCHARGE RATE

June 2022 – The basis of the fuel surcharge is the Department of Energy price index for California U.S. On-Highway Diesel Fuel Prices and can be found at www.eia.gov/petroleum/gasdiesel/. The fuel surcharge will be indexed monthly from a base of \$3.00/gal. On the first Monday of each month, the average of the previous week’s fuel cost will be used to calculate the current month’s fuel surcharge. For every \$0.05 in fuel increase over the \$3.00 base Shamrock will charge a surcharge of \$0.125/Cyd. This fuel surcharge index will be updated with the current fuel surcharge rate for the current month highlighted as shown on the chart below.
